Experience

TEST ENGINEER - 10/2021 – Till Date
Optomany / DNA Payments Group, Kings Hill, Kent

I work in platform project Team of 10 members on the Optomany Payment Platform to carry out API testing on the Payment gateway platform and I also test 3rd party services plugins.

- I determine the priority for test scenarios and create execution plans to implement these scenarios
- I Identify Test Scenarios to automate and ensure this is added to the Test Automation framework
- I ensure Test coverage for most critical features of the Service by creating traceability to the User stories
- I write the documentation for automated tests by creating test plans, procedure and test cases
- I execute tests in the build Automation framework
- I use Kibana Elastic Search to view logs and Application performance
- I document bugs found during test execution according to the bug tracking process and retest when fixed
- I prepare Test execution reports and Release Notification for the Production Release Team to pick up

- I built Kibana Elastic dashboards.

UAT Coordinator - 12/2018 – 03/2020
Uncle Buck Finance PLC, Dartford

I worked with a team of 11 members; I worked as a UAT coordinator to conduct Development and Testing activities on the newly developed Loan Management Systems and liaison with 3rd party vendors.

- I ensured that project deliverables meet business requirements
- I ensure that the project process is followed and adhere to
- I liaise with the Business teams, Development teams and the QA test teams for requirement clarification and obtain sign offs
- I helped in the development and maintenance of business requirement documents
- I developed and maintained test scripts using Zephyr for Jira
- I helped in carrying out Test execution
- I am involved in defect triaging meetings with the development teams and business teams
- I performed database testing and API testing using Postman
- Reporting to the senior management on Business as usual using PowerBi

UAT Support Contractor – 06/2016 – 11/ 2018
ROYAL BANK OF SCOTLAND, (RBS UK)

I worked on the upgraded online banking application that has been integrated with 3rd party software to provide user application and help desk support.

- I wrote end to end business process-based test scripts from business requirements.
- I executed test scripts in accordance with the Test Plan.
- I identified defects, report problems and obtained evidence to enable diagnosis and correction of errors. I retested defects once fixed.
- I maintained good communication with the project teams and business representatives.
- I provided regular progress updates to the UAT Manager
- I contributed to the creation of UAT Test Plans and documentation and reports
- I validated and Sign-offs of completed UAT testing.
